

Attachment No. 3
ELIGIBILITY VERIFICATION
3/13/17

All efforts funded under this project shall be performed by a U.S. company located within the United States or its territories. A U.S. company is defined as a business incorporated or formed as a legal entity in the United States.

The turbine selected by the Subcontractor must already exist and be ready to go through engineering design improvements or manufacturing process upgrades, or be prepared to go through prototype testing, certification testing, or type certification. If the proposed project is for the improvement of a component by the component manufacturer who is not the turbine manufacturer, the proposal must be linked to an existing turbine. All turbine designs meeting the qualifications set forth here are eligible for consideration in this effort.

For purposes of considering this Proposal, Offeror agrees to the following:

_____ Primary output of turbine will be electrical power (for turbines delivering AC power, the frequency is 60 Hz)

_____ Offeror is a U.S. company

_____ Turbine system is manufactured in the U.S. or the manufacturer is active in the U.S. market and uses U.S. supply chain vendors.

Provide location(s) of U.S. turbine manufacturing facilities

_____ Turbine system hardware is all new, not refurbished or remanufactured

_____ If proposal is for turbine testing (prototype, certification or type), an estimated loads report has been completed

_____ If proposal is for turbine testing (prototype, certification or type), the company has all recent relevant certification and design standards.
